

CONTROL TOUGH TERRAIN

THE NEW OPTIONAL PATENT-PENDING full function remote control from Vermeer is available on all TEC® Plus electronic control system tractors. The new remote control allows remote operation of the machine and attachment for select jobsite conditions in surface mining and trenching applications.

THE REMOTE CONTROL is designed to be used in operating conditions such as working near a high wall or loading or unloading onto a trailer.

A SHOULDER HARNESS is included for comfort.

THE SYSTEM allows the operator to be located within a vehicle, such as a pickup, and seated on a mat-style seat switch to operate the attachment functions in work mode.

LIKE ALL VERMEER TRACK TRACTORS the full function remote control is supported by over 120 dedicated Vermeer dealerships worldwide.
