MORE

TO THE TREE CARE INDUSTRY

VERMEER HAS DEEP ROOTS IN THE TREE CARE INDUSTRY

Vermeer has been in the industry since our founder, Gary Vermeer, developed the modern stump grinder in 1957. He was committed to finding a better way. In this case, it was the important work of clearing tree stumps. Today, we still have that same passion for innovation — to find better ways to help you care for and maintain trees in your community.

The future of the tree care industry is bright. Professional tree care services are in high demand. You can count on Vermeer to be a trusted business partner. We are committed to helping you be Equipped to Do More® with a full line of tree care products, backed by the in-depth industry knowledge and support of the Vermeer dealer network.

EXPERT SUPPORT TO HELP YOU DO MORE IMPORTANT WORK

Our commitment to your success goes beyond the sale. From providing insights to comprehensive parts, service and support, Vermeer dealers are tree care experts who can help grow your business so you can continue to do the work your community depends on.

EQUIPPING YOU WITH A FULL TREE CARE LINEUP

Vermeer has you covered with equipment to help you manage tough work and maximize productivity at every jobsite.

Innovative features and ease of maintenance are trademarks of the Vermeer lineup of rugged tree care machines. Our stump cutters, brush chippers, compact articulated loaders and mini skid steers are built for performance and designed with safety in mind.

“We benefit from our relationship with Vermeer. We consider our dealer a friend, and he has opened up a lot of opportunity for us. The relationship goes well beyond dollars and cents with our equipment maintenance.”

— Michael Joseph,
Joseph Tree Service,
Dublin, Ohio

STUMP CUTTERS

FROM THE ORIGINAL INVENTORS

Gary Vermeer invented the modern stump cutter to minimize the labor-intensive work of removing stumps from agricultural fields. Today, Vermeer continues to innovate solutions for challenging jobs, like removing stubborn hardwood tree stumps. With models ranging from 25 horsepower to 74 horsepower (18.6 kW to 55.2 kW), there is a model for nearly every jobsite.

Vermeer models are equipped with exclusive stump-cutting technology designed to maximize productivity, including the Vermeer cutting system (VCS). With the SmartSweep™ control system, tree stumps are swept away, one pass after another. It streamlines operation by monitoring engine load and providing continuous feedback. This results in a smooth and consistent cutter wheel sweep rate.

Stump cutter models include: SC30TX, SC70TX, SC292, SC362, SC382, SC552, SC802 and SC852.

“Efficiency and speed are our job. We’re trying to get jobs done quickly. We have to work on a volume basis and the Vermeer machines help us do that well. Without these machines, it would be impossible.”
— Kenny Schmidt,
Stump Grinding 4 Less,
Muskego, Wisconsin

BRUSH CHIPPERS

DESIGNED TO CLEAR MORE ON YOUR JOBSITE

Brush chipper selection is critical for efficient jobsite clearing. High-production land clearing sites, roadway clearing and residential tree removal projects have diverse requirements. But no matter the job, Vermeer has you covered with a wide selection of brush chippers to handle material with diameters from 6 inches to 21 inches (15.2 cm to 53.3 cm).

Vermeer brush chippers are engineered with exclusive features that deliver ease of operation and high performance, and they're designed with safety in mind. A SmartFeed feed-sensing control maximizes productivity by stopping and reversing the feed roller to optimally process large, hardwood material. A remote control on select models allows for mechanized feeding of the machine. Plus, a bottom feed stop bar can stop the rollers when needed.

Engineered for ease of maintenance and transport, Vermeer brush chippers are an equipment fleet staple for arborists and tree care crews looking to maximize productivity and capitalize on secondary chip markets.

Brush chipper models include: AX17, AX19, BC700XL, BC900XL, BC1000XL, BC1200XL, BC1500, BC1800XL and BC2100XL.

“ We keep coming back to Vermeer because they truly understand the tree care industry from the safety standpoint to the uptime that is needed to run a successful business. We have big trees in this market where you need big chippers. ”

— Nathaniel Wilson,
AKA Tree Service,
Canton, Georgia

MINI SKID STEERS

PROVIDE MORE VERSATILITY

Space is limited on your trailer, so you need a machine that delivers versatility. Vermeer mini skid steers were specifically designed to tackle a variety of tree care jobs. Narrow and lightweight, they can fit into tight spaces with a wide range of operating capacities.

With a heavy-duty lift capacity and multiple attachments that hook up to a universal mounting plate, Vermeer mini skid steers can help ease tasks that previously required manual labor.

Mini skid steer models include:

S450TX, S925TX, CTX50, CTX100 and CTX160.

“The Vermeer CTX160 mini skid steer is our bread and butter. It does most of the work for us.”

– Brad Brown,
Southern Classics Landscape Management, Buford, Georgia

COMPACT ARTICULATED LOADERS

BUILT TO LIFT MORE

Vermeer compact articulated loaders (ATXs) meet the demand for a highly maneuverable, versatile machine with a high lift capacity and the added benefit of low turf disturbance. An ATX handles the tough jobs so crews can get to work.

An attachment plate works with a variety of attachments to power your jobsite and minimize hand labor. Choose a brush grapple for handling limbs and branches, a light material bucket for spreading mulch, a tree auger or tree forks to handle potted burlap ball trees, or one of the many other attachments to handle the task at hand.

Plus, a **telescopic boom** provides additional reach on the jobsite.

Compact articulated loader models include:
ATX530, ATX720, ATX850 and ATX960.
