CHIPPING PRODUCTIVITY. The SmartFeed system monitors engine rpm and automatically stops and reverses the feed rollers to enhance production. This system also senses feed roller jams and manipulates the material automatically to reduce the need for manual control bar use.

EASILY LIFT HEAVY MATERIAL. An optional winch allows operators to move large logs effortlessly. The 150’ (45.7 m) winch line can handle logs up to 2000 lb (907.2 kg) and can automatically lift the logs onto the feed table.

OPERATOR SAFETY. Mounted over the feed table, the four-position upper feed control bar enables the operator to stop the feed rollers and select forward/reverse. The patented bottom feed stop bar is strategically located to make it possible for an operator’s leg to strike the bar and shut off the feed mechanism either intentionally or automatically in an emergency situation.

TAKE CONTROL. With the optional Tree Commander™ remote control, jobsite productivity can be improved by allowing the operator to control brush chipper functions remotely. The remote can be attached to the operator’s belt or held in an optional bracket mounted directly to the operator’s station of a Vermeer compact utility loader.

ENGINE OPTIONS. The BC1500 is offered in either a 165 hp (123 kW) PSI 5.6L gasoline engine and 130 hp (97 kW) Cummins QSF 3.8L Tier 4 Final engine.

SMOOTH FEEDING. Vertical feed rollers with helical cleats help hold material firmly to the infeed table, which reduces vibration, shock and structural loading to the rear of the machine.
