# **PTX40** PLOW/TRENCHER

**MACHINE VERSATILITY.** Utilized for irrigation and utility installations, the versatile PTX40 is a plow/trencher with a dedicated plow depth of up to 24 in (61 cm), a trench depth of up to 42 in (106.7 cm) and a width of 4–6 in (10.2–15.2 cm). The optional bore attachment has a maximum torque of 494 ft-lb (670 Nm).

**ARTICULATED DESIGN.** An articulated design offers enhanced maneuverability in tight spaces and exceptional performance when operating on uneven terrain, maximizing tractive effort.

**REMOTE CONTROL.** When plowing or in transport mode, remote control operation offers flexibility in congested areas, providing the operator both fingertip control and smooth machine handling. The remote control functionality provides adjustability for the operator to maintain visibility to the work area and machine operation from a variety of viewpoints. When trenching, the operator controls utilize a tether that connects the machine and remote control.

**SERVICEABILITY.** Access to required service points, as well as fuel, hydraulic oil, engine oil and air filters, does not require removal of any shielding, which can increase efficiency of machine service and simplify daily maintenance.

**TRACTION OPTIONS.** With a variety of different traction options, the PTX40 is well-suited to contractors' differing needs. The 23 in (58.4 cm) tire option is best for narrow, congested jobsites, the 26 in (66 cm) tire option provides better traction, and the dual tire option accommodates lower ground pressure requirements. Additionally, the PTX40 is available with tracks which are ideal for uneven terrain.

**COMPACT SIZE.** At minimum 40.2 in (102.1 cm) wide and only 55 in (139.7 cm) high, the PTX40 is small enough to navigate smaller jobsites where larger machines can't fit.
