

TREE CARE EQUIPMENT TO TACKLE YOUR TOUGHEST JOBS

Vermeer®

And there's

MORE

where that came from.

Vermeer®

Vermeer

VERMEER HAS DEEP ROOTS IN THE TREE CARE INDUSTRY

Our founder, Gary Vermeer, wanted a better way to clear tree stumps. So he and his team created it. In 1957, their work resulted in the modern stump cutter — and kicked off a tree care equipment legacy.

All these years later, we're still looking for new ways to streamline your work. After all, tree care services are in high demand. And with the industry's bright future ahead, you need a trusted business partner to have your back. That's Vermeer. We're there with a full line of tree care products, backed by the in-depth industry knowledge and local support from knowledgeable dealers.

EXPERT SUPPORT TO HELP YOU DO MORE IMPORTANT WORK

With the support of an experienced dealer network, you're equipped for every stage of the job. Vermeer dealers offer more than equipment. They're tree care pros who want to help grow your business.

Your local dealer can handle comprehensive parts and service, on-site support and equipment insights — so you can focus on the work your community depends on.

EQUIPPING YOU WITH A FULL TREE CARE LINEUP

Need to manage tough work and maximize productivity at every jobsite? We've got you covered. Innovative features and ease of maintenance are trademarks of our rugged tree care lineup. Our stump cutters, brush chippers, compact articulated loaders and mini loaders are built for performance and designed with safety in mind.

“With the relationship I have with Vermeer, I've had zero downtime. They allow me to stay up and going. The contractors I work with never have to wait on me.”

— Andy Poteet,
TeeTop's Stump Grinding
Woodstock, Georgia

STUMP CUTTERS

FROM THE ORIGINAL INVENTORS

It's been decades since Gary Vermeer and his team invented the modern stump cutter. We've built on that work every day since, creating solutions for your most challenging jobs. From exclusive technology to innovative wear parts, everything we do comes back to how you work.

Stumps are swept away one pass after another with the SmartSweep™ control system. It monitors engine load and provides continuous feedback, resulting in consistent performance and less stress on your machine. You can also maximize performance with multiple cutting system options that allow for versatility depending on ground conditions.

And with a lineup ranging from 25 hp to 115 hp (18.6 kW to 85.8 kW), there's a Vermeer stump cutter for your operation.

Stump cutter models include: SC30TX, SC48TX, SC70TX, SC292, SC362, SC402, SC552, SC802, SC852 and SC1052.

Efficiency and speed are our job. We're trying to get jobs done quickly. We have to work on a volume basis, and the Vermeer machines help us do that well. Without these machines, it would be impossible.

– Kenny Schmidt,
Stump Grinding 4 Less,
Muskego, Wisconsin

BRUSH CHIPPER

DESIGNED TO CLEAR MORE ON YOUR JOBSITE

High-production land-clearing work, roadway clearing and residential removal projects all require different equipment. But no matter the job, we've got you covered with a wide selection of brush chippers ready to tackle material with diameters from 6 in to 21 in (15.2 cm to 53.3 cm).

We engineer our lineup with you in mind, from exclusive features that deliver ease of operation and high performance to safety-focused innovations. We designed the SmartFeed system to maximize productivity by monitoring rpm, stopping or reversing feed rollers when necessary, and shifting material if it senses a feed roller jam.

And we developed the lower feed stop bar as a safety innovation that gives operators a fast, instinctive way to shut down the feed rollers. Positioned within easy reach of an operator's leg, it turns a natural reflex into a critical safeguard when reaction time matters. Now, it's the industry standard.

Brush chipper models include: AX17, AX19, BC700XL, BC900XL, BC1000XL, BC1200XL, BC1500, BC1800XL and BC2100XL.

“We keep coming back to Vermeer because they truly understand the tree care industry from the safety standpoint to the uptime that is needed to run a successful business. We have big trees in this market where you need big chippers.”

*– Nathaniel Wilson,
AKA Tree Service,
Canton, Georgia*

MINI LOADERS

ENGINEERED FOR VERSATILITY

What happens when you leave the heavy lifting to a mini loader? You get more done. With a heavy-duty lift capacity and an attachment-ready design, our mini loaders can tackle a variety of tree care jobs. That includes clearing the site, loading your brush chipper and moving mulch — and that's just the beginning.

The cushioned chariot-style operator station is designed for protection and fatigue reduction — keeping you comfortable, secure, and focused from first light to last load. And with toolless engine access panels, routine maintenance charts and a spring-tensioned greaseless track system, upkeep is simple — allowing you to stay focused on the job.

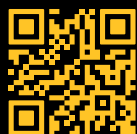

Mini loader models include:

ML80, ML100, ML130 and ML150.

“The ML100 has been an excellent addition to our fleet, offering significantly more power and much smoother operation. It performs reliably and hasn’t let me down, so I highly recommend it.”

– Russell Myers,
Arborcare by Myers
Granger, Iowa

COMPACT ARTICULATED LOADERS

READY TO HANDLE THE JOB

When the jobsite calls for highly maneuverable, versatile machinery, our compact articulated loaders (ATXs) answer — while also delivering high lift capacity and low turf disturbance.

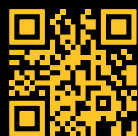

Power your jobsite and minimize hand labor with a full range of compatible attachments made for tree care. Choose a brush grapple for handling limbs and branches, a light material bucket for spreading mulch, a tree auger or tree forks to handle potted burlap ball trees, or one of the many others engineered to handle whatever comes your way. Plus, a telescopic boom provides additional reach on the jobsite.

Compact articulated loader models include:
ATX530, ATX720, ATX850 and ATX960.

“[The ATX] makes us quicker and more efficient. Plus it saves your energy. You’re not dog tired at the end of the day. Since we got it, we’ve used it every single day on at least one job.”

*Robbie Sisson,
Sisson’s Tree Service LLC,
Stillman Valley, Illinois*
