

Vermeer® Quick-Clip Blade Retention Radio Script

:60 Second Radio – Quick-Clip

If you cut hay with a disc mower _____ has great news!

dealer name

The Quick-Clip Blade Retention System from Vermeer lets you change out a full set of disc-style cutting blades, quickly and easily. In minutes!

The Quick-Clip is the fastest replacement system in the field! And standard on all Vermeer Disc-Style Mowers, Mower Conditioners and Trailed Mowers.

Just slide out the clip ... re-load ... and tap in a new one. It's that simple!

Quick-Clip reduces maintenance time. Low profile "crop lifters" promote clean cutting action. And the best part, is the number of parts! Instead of fumbling around with all sorts of bolts, washers and lock nuts, all you need is a Quick-Clip and a mounting pin to hold the Vermeer blade, which incidentally is 20% thicker than most the other disc blades you'll find out there. Plus, it's austemper heat-treated for longer wear.

Increase mowing time in the field. Stop wasting time and money on old fashion blade mounts. Take a trip to _____ today and check out the Quick-Clip from Vermeer.
