

# WHICH CUTTING SYSTEM IS RIGHT FOR YOU?

## A GUIDE TO CUTTING SYSTEMS FOR YOUR VERMEER STUMP CUTTER

Since the invention of the stump cutter, Vermeer has continued to revolutionize its product line with new ways to help customers increase machine productivity. With two unique cutting systems designed for lower- and higher-horsepower units, customers can have confidence that their Vermeer yellow iron is equipped to tackle the job at hand.

Learn more about the benefits of the Yellow Jacket™ cutter system and the Vermeer cutting system.

### YELLOW JACKET SYSTEM

Vermeer stump cutters under 50 hp (37.3 kW) come equipped with the Yellow Jacket cutter system.

SC30TX

SC362

SC382

SC40TX

This Vermeer-exclusive system was designed to make maintenance convenient and help extend the life of wear parts like pockets and teeth. Plus, with only one tooth and three pocket styles within the system, you can help keep your wear part inventory low and your productivity high.

### VERMEER CUTTING SYSTEM

Vermeer stump cutters over 50 hp (37.3 kW) come equipped with the Vermeer cutting system.

SC552

SC70TX

SC852

SC802

The Vermeer cutting system features a patent-pending tooth design that is convenient to use and maintain. With a two-sided cutter design, the V-profile of the carbide on each tooth maximizes cutting productivity. When Vermeer yellow iron is on the job and at the stump, you can feel confident in a job well done.
