

ML80

MINI LOADER

COMPACT. CAPABLE. CONFIDENT.

COMPACT PRODUCTIVITY

Get ready for efficient performance in a compact footprint. Featuring a 24.7-hp (18.4 kW) diesel engine and increased operating capacity, the ML80 packs a punch for its size.

SMARTER, STRONGER OPERATION

Compared to previous models, the enhanced hydraulic system on the ML80 helps optimize filtration to minimize oil contamination, improving hydraulic component longevity and maximizing the efficiency of tractive effort. This provides operators with greater confidence to power through tough jobs.

VERSATILE AND COMPATIBLE

When you have the right attachments, you can tackle more jobs in less time. Vermeer offers a comprehensive lineup of high-quality common industry interface (CII) attachments that are rigorously tested to ensure compatibility on the ML80 – providing the best possible ownership experience.

OPERATOR-FOCUSED DESIGN

The Vermeer ML80 is built for long days and rough terrain. The cushioned chariot-style operator station is designed for protection and fatigue reduction – keeping you comfortable, secure and focused from first light to last load.

BUILT-IN CONFIDENCE

Bring peace of mind to every job site. Beyond the standard warranty, the ML80 comes equipped with additional coverage on the loader arms, mainframe and Rehlko engine. And with support from your local Vermeer dealer, service and expertise are always close by.

MAINTENANCE-FRIENDLY

Spend less time on maintenance and more time getting the work done. With toolless engine access panels, routine maintenance charts and a spring tensioned greaseless track system, upkeep is simple – allowing you to stay focused on the job.
