## Catapult® CPX9000 Bale Processor

:30 Second Radio:

The new Catapult CPX9000 bale processor from Vermeer distributes forage materials CONSISTENTLY and ACCURATELY at long distances -- like up to 100 feet.

It gives you the versatility to adjust throw distances and control how the spout is angled -- so you can distribute the material up and over feed bunks, just like you want it.

Making it ideal for both livestock bedding and erosion control applications.

Plus, it's from Vermeer -- so you know it's durable.

Come see us today at \_\_\_\_\_ in, \_\_\_\_\_ and ask about the new Catapult CPX9000 bale processor. It's built to go the distance. Only available at select Vermeer dealers.
