

A TROMMEL SCREEN MADE FOR MOBILITY.

And there's

MORE

where that came from.

TR6500TX ***TROMMEL SCREEN***

3 WAYS
**THE TR6500TX ENHANCES
JOBSITE FLEXIBILITY**

Efficient operation

Place material where you need it. The TR6500TX comes standard with a radial fines conveyor with adjustable height control. Plus, make adjustments with a full-function wireless remote.

Precision. Capacity. Versatility. Durability. The TR6500TX brings together all the best from the Vermeer trommel screen lineup — plus the flexibility of a tracked machine. It's engineered for serious productivity, featuring a large hopper with a low loading height. Quick-change tension screens mean you can spend less time setting up and more time sorting material. The full-function remote empowers one person to set up, move and operate the TR6500TX.

**WATCH THE TR6500TX
TROMMEL SCREEN WORK.**

Practical mobility

Move the machine, not the material. The tracked undercarriage reduces loader movement for a more productive jobsite — and the full-function wireless remote helps minimize operator involvement when needing to make adjustments to the machine.

Productive design

Get back to work fast with a quick-change screen system engineered to let you sort different material sizes or types without changing the entire drum. Compared to steel panels, the tensioned wire system maximizes the open screen area, allowing for optimal throughput.

INSIDE THE TR6500TX TROMMEL SCREEN

IMPRESSIVE PRODUCTIVITY

Get best-in-class hopper capacity.

Handle a high volume of material with 10 yd³ (7.6 m³) of hopper capacity engineered to maximize screening efficiency by keeping the drum full.

CUSTOM CONFIGURATIONS

Choose your setup.

Match your equipment to your material with quick-change screens available in a wide variety of panel openings, wire gauges and wire types. You can also further tailor your screening experience with options like dual brushes, drum covers or a magnetic head pulley.

ADJUSTABLE CONVEYOR HEIGHT

Put material where you need it.

The TR6500TX trommel screen includes conveyors that can be raised or lowered for fines and overs, helping prevent material loss in windy conditions and reduce dust.

ONE DRUM SIZE. THREE MACHINES TO CHOOSE FROM.

Find the right trommel screen for your operation.

TR6400, TR6450 and TR6500 trommel screens are engineered with the same drum, so you can focus on the features that matter most to your business.

BACKED BY THE VERMEER DEALER NETWORK

No one knows yellow iron like Vermeer dealers and their **Recycling and Forestry specialists**. Experienced in the field and highly trained to deliver support for your operation, these local specialists are ready to answer the call any time of the day. They're not only here for your crew — they're part of it.

Connect with your Vermeer dealer to find your nearest specialist.
